

RENTAL INSURANCE REQUIREMENTS

Light Tec's rental Lease Agreement requires that you as Lessee be fully responsible for any damage/loss to rental equipment while it is in your possession and that proof of adequate all-risk insurance coverage may be required prior to rental of equipment.

Effective immediately, off-premises insurance coverage for our rental equipment is mandatory. This may be accomplished as follows:

An insurance certificate for all-risk physical damage/loss naming Light Tec, Inc. as additional insured and/or loss payee from your insurance company for the full replacement value of the rental equipment must be on file with Light Tec prior to any rental.

This insurance binder must have an expiration date of no less than thirty (30) days past the end of the rental period. If the certificate is to be modified, amended, or changed, a new certificate must be on file prior to the expiration date of the original.

Please Note: if you do not have a current insurance certificate on file with Light Tec prior to the rental of equipment, you as Lessee are fully and completely responsible for any damage to and/or loss of the rental equipment. You as Lessee are also liable for equipment rental charges from the time of the loss or damage until the time the lost or damaged equipment is replaced and/or returned to Light Tec in operating condition.

If you have questions, please contact us.
